

**File No. 304-3/2015-QoS**  
**TELECOM REGULATORY AUTHORITY OF INDIA**  
**(Quality of Service Division)**

**Dated: 13<sup>th</sup> February, 2015**

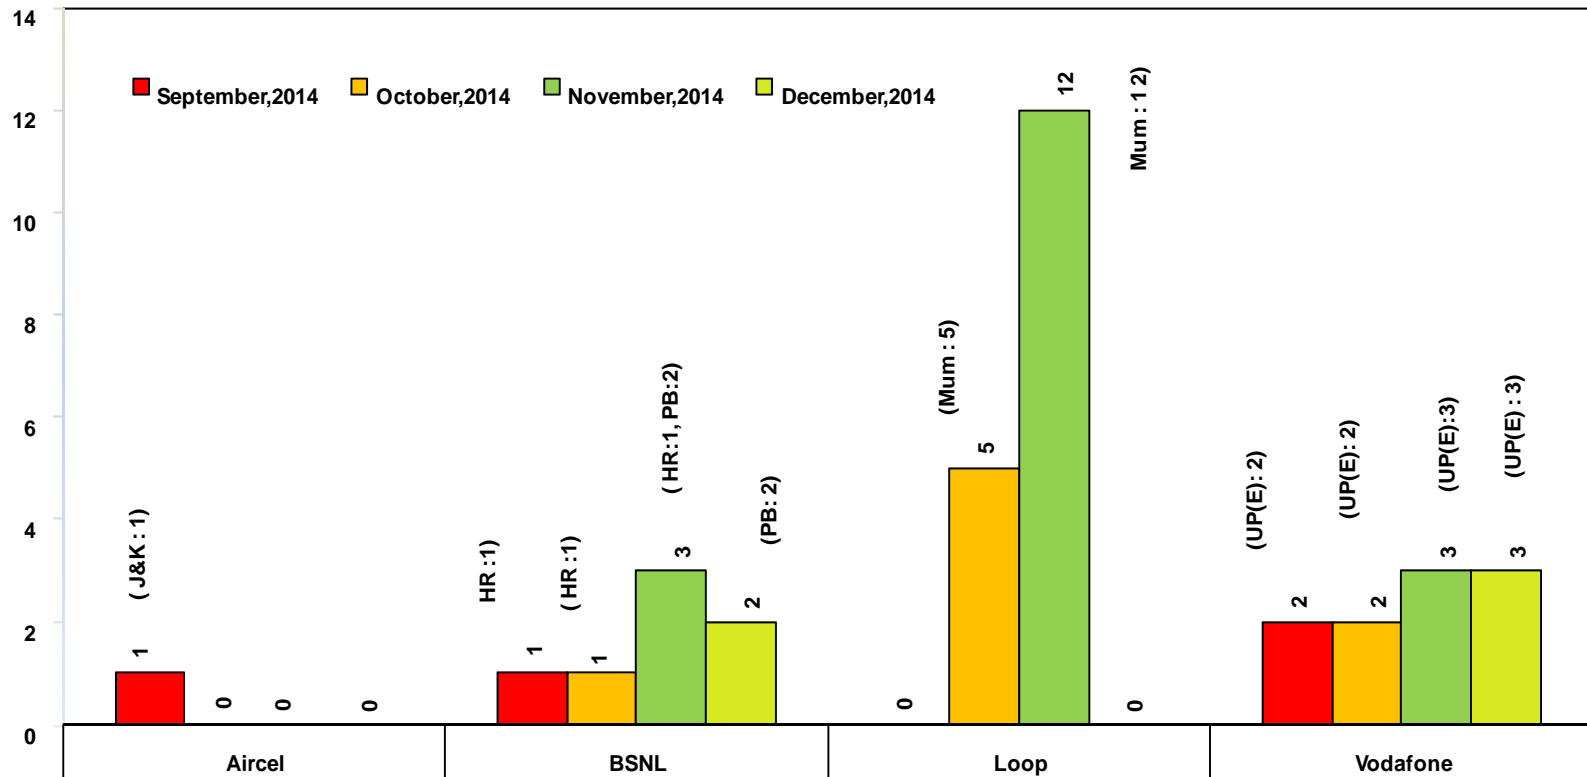

**Point of Interconnection (POIs) Congestion report of the Cellular Mobile Telephone Service Providers (CMTS) and Basic Telephone Service (Wireline) Providers for the months of October, November & December, 2014.**

TRAI has been monitoring the level of congestion at the Point of Interconnection (POI) between various service providers on monthly basis. This parameter signifies the ease with which a customer of one network is able to communicate with a customer of another network. This parameter also reflects as to how effective is the interconnection between two networks. The benchmark notified by TRAI in the QoS Regulations for this parameter is <0.5%. This means out of 200 calls between two operators only one call should face congestion. The result of the monitoring reveals that degree of congestion between the operators is generally within limit in most of the areas.

**A. Cellular Mobile Telephone Service :**

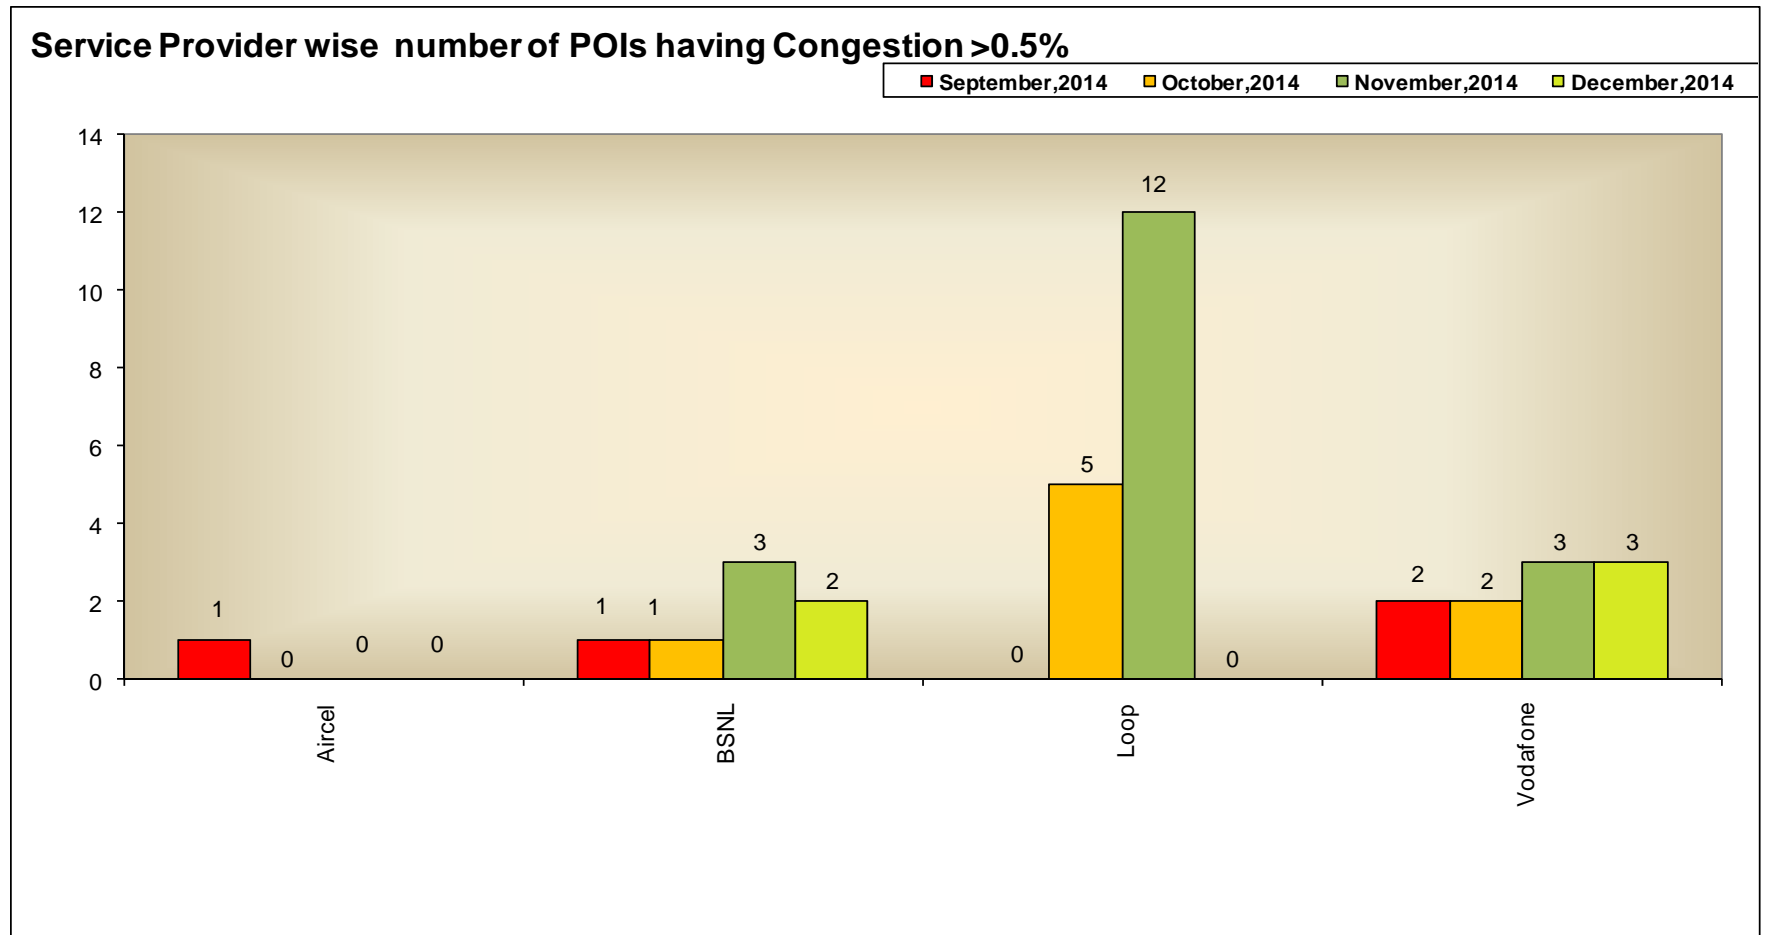

- Cellular Mobile Service Providers (CMSPs) have submitted their POIs Congestion Reports to TRAI for the months of October, November & December, 2014.
- This report includes only the Service Providers who do not meet TRAI's stipulated POI Congestion benchmark of <0.5% in any of their service area.
- The number of POIs having congestion has increased from 4 POIs in September 2014 to 5 POIs in December, 2014.
- M/s Aircel has no POI congestion in month of October, November & December, 2014.
- M/s Vodafone has congestion in 2 POIs in October, 2014, 3 POIs in November and 3 POIs in December, 2014.
- M/s Loop has congestion in 5 POIs in October, 2014, 12 POIs in November. The CMTS Licence of M/s Loop has expired on 28<sup>th</sup> November, 2014. Now, the service of M/s Loop is closed.
- M/s BSNL has congestion in 1 POI in October 2014, 3 POIs in November and 2 POIs in December, 2014
- The affected circles/states due to POI congestion are Haryana, Mumbai, Punjab and UP(E).

Service Provider wise & service Area wise number of POIs having Congestion level >0.5% (CMTS)

	Aircel	BSNL	Loop	Vodafone
September,2014	1	1	0	2
October,2014	0	1	5	2
November,2014	0	3	12	3
December,2014	0	2	0	3

**(ii) Service Provider wise POI Congestion (CMTS)**

(iii) Service Area wise POI Congestion (CMTS)

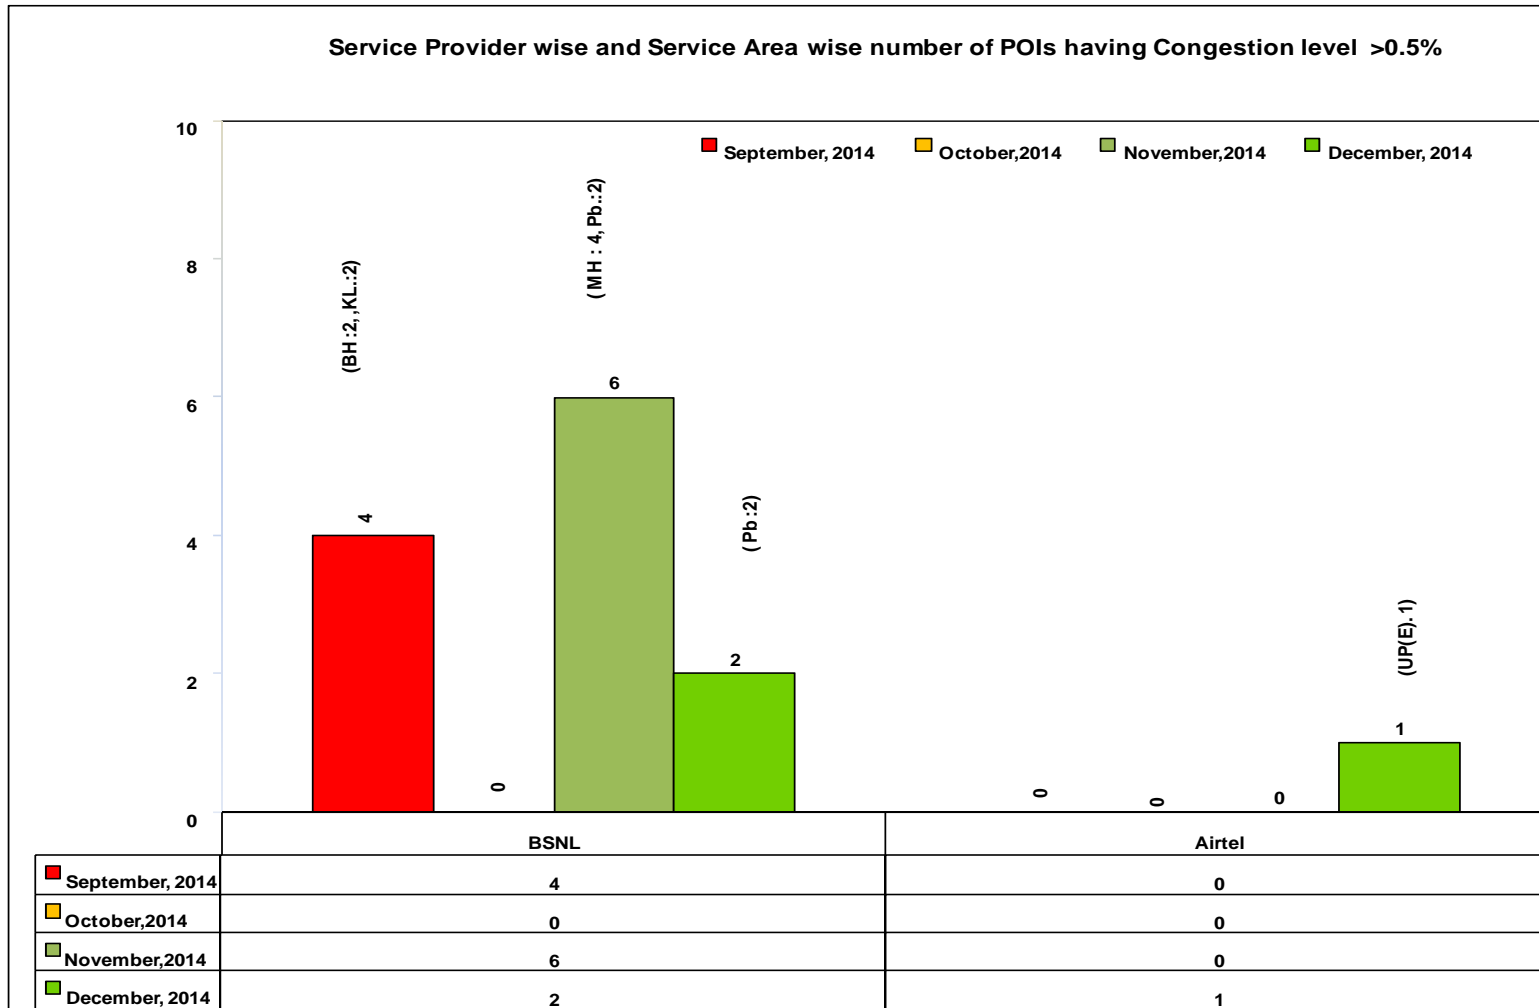

### **Basic Telephone Service (Wireline) :**

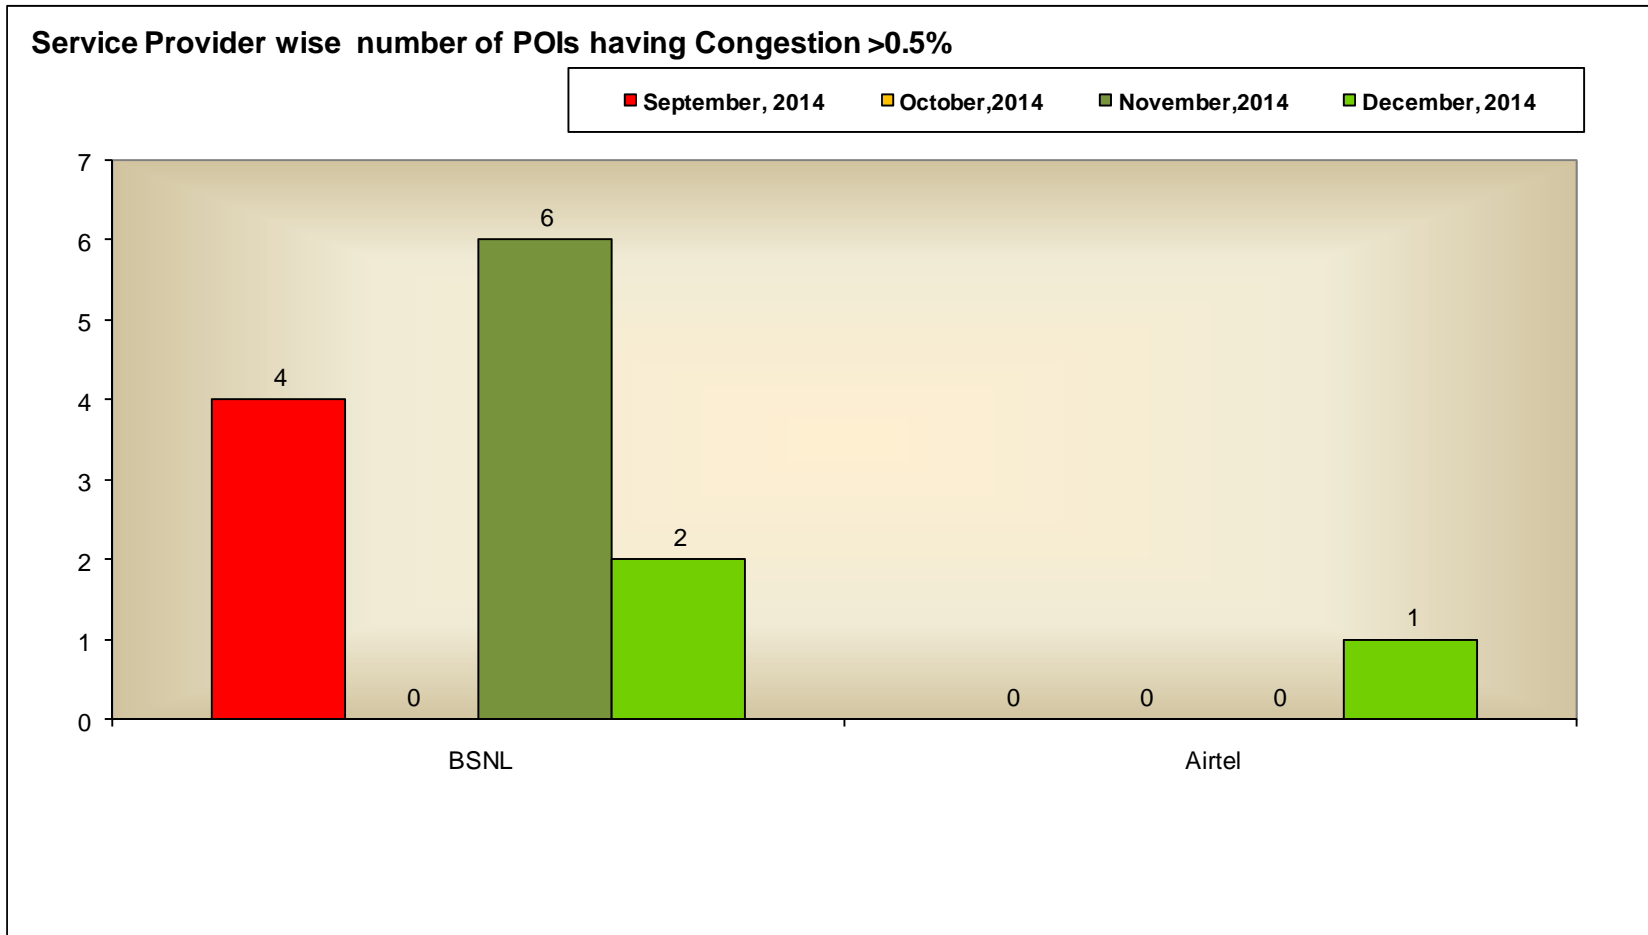

As per the Regulations, 2009, Basic Telephone Service (Wireline) Providers have submitted their POIs Congestion Reports to TRAI for the months of October, November & December, 2014.

- This report includes only the Service Providers who do not meet the TRAI's stipulated POI Congestion benchmark of <0.5% in any of their service area.
- The POI Congestion Report shows that the performance of the Basic Telephone Service (Wireline) providers with respect to the congestion on POIs in the month of December,2014 has decreased from 4 in September 2014 to 3 in December 2014.
- M/s BSNL has congestion in no POI in October, 6 POIs in November and 2 POIs in December,2014.
- M/s Airtel has congestion in 1 POI in December,2014.
- The affected Circles/ States due to POI congestion are MH, Punjab and UP(W).

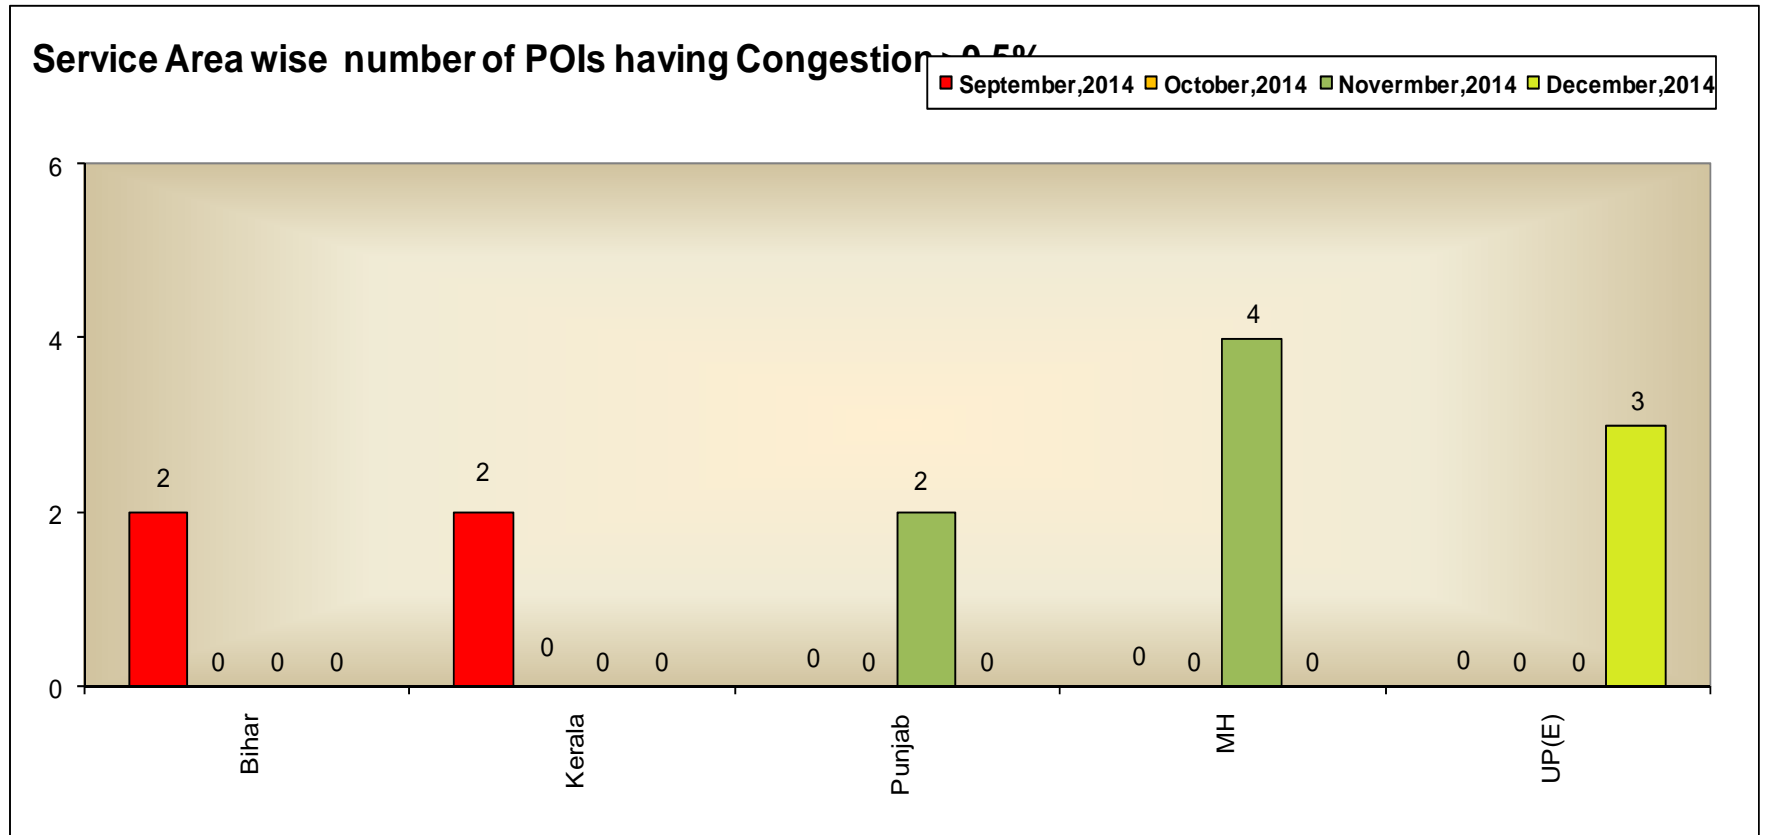

(iv) Service Provider wise POI Congestion (Basic Telephone Service (Wireline))

**(v) Service Provider wise POI Congestion (Basic Telephone Service (Wireline))**

**(vi) Service Provider wise POI Congestion (Basic Telephone Service wireline)**

The non-provisioning and insufficient provisioning of telecom circuit resource as per traffic requirements leads to:

- inter-network congestion at the Point of Interconnection (POI)
- loss of calls
- repeated call attempts by consumers
- deterioration in Quality of Service (QoS)
- 
- consumer dissatisfaction
