Subject: TRAI proposal to increase mobile wireless speed

Dear Sir,

Reference to your press release 20/2014, I would like to request you that in CDMA even EVDO HSD should must have minimum 1 Mbps speed as CDMA HSD is capable of delivering upto 3.1 Mbps and all CDMA operators have been offering speed of 3.1 Mbps in past, now that they do not invest into network and spectrum their speed is falling down like any thing.

It will be injustice to CDMA subscribers if they are not offered reasonable speed internet access.

Best regards
Kalpak Shah
