Subject: The Standards of Quality of services regulations 2012

Sir

1> The Browsing speed in 2g\G should be 225 KBPS & content downloading speed be around 120 KBPS because now Network company using 2.5G Technology called Edge .

2>Yes , the service provider should be mandated to inform the minimum download speed to customers along with each tariff plan , but it should be above the Minimum download speed for every plan or without GPRS plan it should be cut off Speed ie 120KBPS.

Regards  
kapil
