13/03/2020

Dear Sir/Madam,

We apologise for the delayed response due to the weekend and the coronavirus scare that has taken root in the society. The fixing/setting of the floor price for telecom services smells of a conspiracy to rob the population of our country of availing essential services at reasonable/competitive prices. This will force the mass population of the country to which is dependant on voice for now and data for the future to shell out more money and fill the pockets of the telecom firms and in turn their promoters.

Fixing of the pricing for the telecom service is like fixing the price of a essential medicine and is akin to increasing the burden on the general population hence leading to a dent in the Digitization Drive of Digital India initiative of our PM.

**Thanking You**

**Yours Faithfully**
