

Hi,

I am against the lawful interception of VoIP messages and calls.

We need to have end to end encryption in place for people to feel safe especially after the order released by MHA today which gives the Indian Government with full access to every computer/smartphone even without a warrant.

Please don't turn India into a surveillance state like China.

I need your help.

Also, don't allow the telecom companies to harass us and take Rs.23 from us every 28 days just so we can keep a number active.

And a month is 30 days not 28 days.

Please I beg you to stop allowing Telecom companies to harass us.

Thanks and Regards,

Ankit Yadav
