dear. sir

- 1, If possible, cancel the self-audit rule or make audits every three or five years.
  - 2, You can keep the calendar year for an audit as you see fit.
  - 3, CAS - SMS and BIS certificates are valid once issued as vendors charge a lot for frequent updates.
  - 4, CAS and SMS vendors also need to be priced because they charge as much as they want.
  - 5, In networks driven by piracy, all broadcasters take action together and try to pay attention.
  - 6, If there is a problem with the broadcaster and SMS report, it can get audited in its own way.
  - 7, MSO licenses issued for 10 years are requested to be life time.
  - 8, MSO licenses should also provide a facility to change names .
  - 9, The broadcasters should also provide reasonable rates for the package for villages.
-
